

Micro Green® 15 • 15-5-8

DESCRIPTION: 100% AVAILABLE PROFESSIONAL MICRO SIZE GREENS FERTILIZER

BENEFITS: BEST® MICRO GREEN® 15 15-5-8:

- Is a high-quality homogeneous greens fertilizer with a maintenance ratio of macro nutrients.
- Is 100% available (no slow release). These micro size pellets will "water in" very quickly and provide the professional superintendent with quick predictable results.
- Will take the guesswork out of residual nitrogen (slow release) availability in the soil when used consistently. This is especially useful during hot summer months when nitrogen management is critical for disease suppression.
- Is not a blend of several particles. MICRO GREEN is a homogeneous (all nutrients in each pellet) material with Sulfur and Iron.
- Represents a cost-effective alternative to slow release and water soluble fertilizers.
- Is very economical. MICRO GREEN is less than half the price of most commonly used greens fertilizers.

APPLICATION RATES:

Lbs. of Actual Nitrogen desired per 1,000 sq. ft.	Lbs. of Micro Green® 15-5-8 To Apply per 1,000 sq. ft.	Lbs. of Actual K ₂ O Applied per 1,000 sq. ft.
